Philips asked the parties to decide on the compromise by themselves if possible, and an effort at settling the controversy was made. The hondholders were obdurate, however, and refused the off-red compromise. An Attack All Along the Line. In St. Louis the Presbyterian, Methodist, Reformed Episcopal, Baptist, Christian, Lutheran and Congrega tional churches are in favor of united evangelistic work in the city. It has been recommended that the date for beginning the work be fixed upon January 1, 1893, and that union services continue at least one month: that the plan of work be to hold a daily central meeting in the morning of each day where all the workers can meet: that the city be divided into five sections or districts, in which the pastors shall cooperate and arrange the work.

#### THE COTTON OUTLOOK.

Synopsis of the Monthly Report from the Memphis District-The Condition and Probable Yield of the Staple Not Improved Since Last Report-Cool Weather Had a Damaging Effect in Some Sec

MEMPHIS, Tenn., Oct. 1.-The regu ar monthly cotton report for the Memphis district, which embraces west Tennesse, north Mississippi, north Arkansas and north Alabama, published by Hill, Fontaine & Co., says:

The weather during September has, in the main, been favorable for cotton, but for the entire season 260 out of the total of 358 of our correspondents report it less favorable than last rear. The cool spell that prevailed about two weeks ago had a damaging effect, and, followed as it was by warm weather, caused heavy shedding of bolls. There is general complaint throughout the district of poor fruiting and of lamage to the crop from boll-worms, rust and shedding. The worms are reported principally in Arkansas. Picking has commenced in every state, but will not be general throughout the district until

October 10. The season on an average is twenty days later than last season, and serious damage would result from a frost earlier than common The prospective yield as compared with last year indicates a decrease of 2513 per cent., as follows: Mississippi, 2614 per cent. decrease Arkansas, 2523 per cent. decrease; Alabama, 25 per cent. decrease: Tennessee, 241/2 per cent. ecrease. The average date of killing frosts in this district is October 25, and the estimated yield as given above is based on the belief that he seasons will continue favorable.

His family was furious and tried to have the marriage annuled. The prince, however, was loval to his bride. He was then deprived of his hereditary rights and was ostracized from the society of the nobility. He lived happily with wife and made no efto regain his lost 50 position. He reared sevchildren of great personal beauty, and with them and his wife he passed most of his time without interest for court or politics. Occasional efforts to reconcile him with his family were shattered by his indifference. Fo-day, however, contemporaneously with the announcement of his daughter's engagement to a distinguished diplomatist, it is stated that his family have relented; that he will be restored to all his hereditary rights, and that all his old friends and acquaintances have raised the social boycott to which they have subjected him and his family for thirty-five years.

## THE BUSINESS OUTLOOK.

R. G. Dan & Co.'s Weekly Review of the Condition of Trade Throughout the Country-Business Generally Active, Money in Ample Supply and Collectio Satisfactory-A Better Feeling in the South Caused by a Slight Advance in Cotton-Business Failures, Etc.

NEW YORK, Oct. 1 .- R. G. Dun & Co.'s weekly review of trade says: Business continues larger than ever at this time of the year, and the commercial sky is without a cloud. While the season brings the usual shrinkage in distribution of textile goods the mills are nevertheless crowded with or-ders, and the demand for the products of iron and steel and leather has improved. Money is in ample supply and collections have very rarely been more generally satisfactory; so that the demand for commercial loans is unusually light for the season. The outgo of the country is larger than usual, and yet there is no embarrassment. Crop reports are unl-formally favorable and the promise is distinctly better than it was a few weeks ago. At the south trade is nevertheless much encouraged by some advance in the price of cotton, and is therefore more active. In general, business is rot only large and remarkably healthy, but the outlook for the coming months is

everywhere regarded with the utmost confi-At Boston dry goods are active, and the mills very busy with the demand, such, in some lines, that they cannot produce goods fast nough. Collections are excellent, and all sections seem to have money enough for payment of bills. The boot and shoe trade is very satis-

At Philadelphia iron improves with large sales, and hardware, recently quiet, is now more active. The liquor and tobacco trades are busy, and also the manufacture of cigars. The jewelry trade improves with trade in oil and naval stores. Dry goods are moving steadily, and trade in groceries and glassware is very busy. Iron is in better demand at Pittsburg, and the glass business good. At Cleveland trade is improving and larger than last year, and at Cincinnati the clothing trade is better than previous years, though a slight decline is seen at the south, for the western trade largely exceeds previous rec-

Chicago reports merchandise sales greater than last year, the harvest progressing well, money active, with much larger outgoes to the interior than last year, and all conditions favorable. Receipts of products show increase in everything except rye, moderate in flour, pork, cheese, wool and hides, a quarter in barley, seed, hogs and sheep, two-thirds in butter, twofold in dressed beef, cured meats, lard and breomcorn, and threefold in wheat, corn and

At St. Louis business is distinctly better in dry goods, shoes, hats and railway supplies, and collections prompt. At St. Paul business s larger than a year ago. at Omaha very active, with increase over last year in many lines. At Kansas City good. Business at Denver is moderate, the weather being warm and collections slow. At the south generally improving, though caution prevails at Memphis. Better prices for cotton bring larger trade at Montmery, and though business is only fair at New Orleans, sugar is strong and active and

noney in good demand ulation in breadstuffs is lower with small transactions. Wheat and oats are nearly a cent, and corn 13s cent lower, and receipts of wheat at western points have been 6,342,695 bushels in four days, against exports of only 659,116 bushels. Speculation in cotton has been enormous, sales reaching 1,360,000 bales, with an advance of a quarter during the week, in spite of better receipts and more favorable crop reports. Pork products are higher, pork 75 cent per barrel, lard 55 and hogs 25 cents per 100 pounds. Coffee is an eighth stronger, but oil about two cents lower. Western receipts of cattle are 175,001 head, against 145,000 the at cut rates, deliveries having been this month at May prices, and agents decline to make another nominal advance.

The Hebrew holidays cause the usual decrease in sales of textile goods, the cholers scare has diverted many buyers from New York, and it is between seasons for woolens, but dealings are still large. The outlook in woolens is excellent, and sales of wool improve here and at Philadelphia, where the consumption is greater than in any other year, though some concessions on territories and Ohio delains are seen at Boston. At the three markets 233,-000,000 pounds have been sold this year against 189,000,000 last year to date. Cottons are less active and some ginghams a shade lower. Trade in knit goods is hesitating and production a little below last years'. but stocks of woolens are small, trade in carpets is active. Boot and shoe works are pressed to meet their orders and the shipments from Boston for the year thus far show an increase of 5.3 per cent. over last years, and 46.8 per cent. over those of ten years ago. Large sales of pig iron are reported, espe at Cincinnati, and some advance in prices is expected. All works making structural iron are bar iron is still weak. Copper is unchanged at one-fourteenth cents, tin hesitating at 2.25 and lead dull at 4.7019. Though exports from New York for four weeks have been 22 per cent. smaller in value than a year ago, they exceed last week. Foreign exchange has risen slightly, and money has advanced to 5 per cent., but no anxiety is felt, and stocks are a shade stronger than a week ago. The treasury has paid out \$800,000 more notes against as much more silver added, and has taken in \$2,000,000 more gold during the week, but the demand for money at the west and south continues

The business failures occurring throughout the country during the last seven days number, for the United States, 177, and for Canada 31; or a total of 208, as compared with 211 last week, and 192 for the week previous to the last and 230 for the corresponding week of last year.

Canadian Business Outlook. New York, Oct. 1.—Special telegrams to Bradstreet's indicate that general trade has fallen off somewhat in the province of Quebec. but the volume is increasing. Dry goods and hardware merchants have made large sales, In Ontario a very fair trade is reported in staple lines, with excellent prospects. Stocks of wheat at every country elevator are increas ing. Export steam rates to Europe from Mon-treal are low.

## Forced to Cancel All Dates.

OMAHA, Neb., Oct. 1.-Lorenzo

Crounz, republican candidate for go ernor, has been forced to cancel all dates and places. A few days ago one of his eyes began paining him, but no particular attention was paid to it. Last night, however, the pain was intense, and this morning he consulted an oculist. It developed that an ulcer had formed on the ball of one eye, and that the other eye is sympathetically affected. Judge Crounz hopes to be able to begin work by October 15, but his physician says it is not likely that he can.
